

# DQISPRUCEDNSETUP RELEASE NOTES

JULY 16, 2019

## DQIDQISpruceDNSetup v7.1.9 (20190716)

New version available in downloads – DQISpruceDNSetup vr7.1.9 (20190716)

Changes:

1. New options – found under Import tab:
  - a. 'Set ALL new jobs NoLatLong' – jobs that are created by the importer will have NoLatLong flag turned on
  - b. 'Use ShippingName instead of Name' – the ShippingName field will be used for order and trip ShipTo fields instead of the Name field.
2. DQ Map Web Service URL – found under Web Services tab.
  - a. During import, the job lat/long or order droplat/droplong can now be geocoded using the map web service
