Delivery Management Solutions for HVACR Distributors

Smarter routing. Faster deliveries. Happier customers.

Co-Branded by epaCUBE + DQ Technologies

Your Challenges

HARDI distributors face increasing pressure to deliver faster, communicate better, and operate more efficiently.

But without real-time visibility, accurate routing, or proof of delivery, daily operations can quickly become costly and customer expectations harder to meet.

Our Solutions

DQT provides HVACR distributors with a modern, end-to-end delivery management system designed to reduce delays, streamline operations, and enhance the customer experience.
Once an order is placed, DQT optimizes routes for faster fulfillment, simplifies dispatching, and provides real-time visibility into every vehicle and delivery.

Teams get up-to-date ETAs across the entire organization, keeping both customers and internal stakeholders informed at every step.
With built-in proof of delivery, including photos, notes, and signatures, each delivery is fully documented, reducing disputes and strengthening trust.

DQT brings complete transparency to the workflow from dispatch to doorstep, helping distributors improve accuracy, operate more efficiently, and deliver with confidence.

Offerings:

STREAMLINE OPERATIONS
- Intelligent dispatch + scheduling
- Optimized routing + trip management
- Load, capacity, and geography-based planning

REAL-TIME TRACKING & ACCOUNTABILITY
- Integrated GPS visibility
- Live vehicle movement + ETA accuracy
- Dynamic geofencing + in-route alerts

SEAMLESS HVACR INTEGRATION
- Works with major distribution ERPs
- Fast onboarding for multi-branch networks

ELEVATE CUSTOMER EXPERIENCE
- Real-time delivery status notifications
- Proof of delivery (photos + signatures)
- Fewer service calls, faster confirmations

END-TO-END FLEET MANAGEMENT
- Track, analyze, and improve fleet performance
- Built-in vehicle maintenance tools
- Support for dash cams + accountability features
